- ▶ Braille elements for blind and severely visually impaired persons
- ▶ Numerous combinations of these different finishing options
- ▶ Making of hand-made prototypes

GrassGreen![®]
SUSTAINABLE PACKAGING. MADE WITH GRASS.

Mail & Ship Packaging Made of Grass-Board and -Corr. Board

Discover the advantages

1. Eco-Friendliness

- ▶ Quickly renewable raw material, protects the forests
- ▶ Regional origin of unused agricultural land or compensation areas
- ▶ Reduced CO2 emissions through lower energy consumption during production
- ▶ Significantly lower water consumption than in pulp production from wood
- ▶ Minimal use of process chemicals in production
- ▶ Up to 40% grass content, the remaining part is naturally made of waste paper fiber
- ▶ 100% recyclable and compostable: 100% environmentally friendly

2. Attract Attention. Strengthen Your Image.

- ▶ The first experience of the recipient is the visual and haptic effect, which immediately conveys 100% of the ecological properties of the packaging.
- ▶ While brown or grey is no longer perceived as a standard in the mass of shipments, this product immediately attracts a high level of attention and directly demonstrates the sender's ecological responsibility.

3. Safety & Protection

- ▶ The properties of the grass material are comparable to other boxes made of recycled paper fibre; thus our packaging remains as protective as ever.
- ▶ With our assortment products made of grass cardboard you can be sure that in addition to the grass fibre content, the remaining part is made of 100% recycled paper fibres. Please pay attention to this!

PRODUCT-SERIES	Product-Group	Starting from Art.No.
