## ABOUT US

**Strong in Standard.  
Creative in Particular.**

Wide range of stock

Great value for money

Creative custom-made products

Top service and fast delivery

A trustworthy partner

Under this slogan, Pohl-Scandia GmbH have for decades been specialising in mailing bags and envelopes made from paper, cardboard and corrugated board and in many other mailing solutions.

As one of the leading manufacturers of packaging solutions for a safe and efficient dispatch, we offer a wide range of immediately available standard products and a large variety of customised production options and services. One of our principles is "Packaging safely and attractively with Pohl-Scandia".

***We stock a strong range of standard products.***

Top quality. Wide selection. Efficient handling. High degree of functionality. Variable applications. Greatest possible reduction of material and postage costs. 100% environmentally compatible and rapidly available.

This is where our packaging programme scores and provides for a professional, favourably priced shipping combined with maximum protection and great value for money.

***We get particularly creative when it comes to custom-made products***

Customised mailing packaging with numerous finishing options is our special strength. We offer appealing and extraordinary options for innovative custom-made products - entirely to your preferences and requirements, conjointly developed with you and produced in best quality on state-of-the art machinery.

***Product support and services***

If you have any questions, our customer service will gladly advice and assist you. Supported by our experienced product designers, we will determine the ideal solution for you - whether this means picking the most suitable packaging from our standard range or designing a customised, clever solution just for you. As an option, Pohl-Scandia also offers a layout service to assist you in designing your print motifs. Or perhaps you require processing to design your own sales units with customised bundling and labelling?

We would also be happy to co-pack your projects with our packaging. In addition, we can take on the storage, the picking of demand-oriented packaging units and the transaction of the entire dispatch process. Neutral third-party deliveries directly to your customers can be easily arranged.

To put it in a nutshell: Our focus will always be on you and your project!

***Partnership and trust***

Our customers know us to be a professional and reliable partner. It is our declared goal to conjointly implement tasks and goals to the greatest satisfaction of our customers.

With our team of experts, excellently complemented by a first-rate, innovative partner - our affiliated company Karl Knauer KG - we are truly able to put a top team at your side.

Place your trust in Pohl-Scandia - like so many others have done, some already for decades: whether city booksellers, medium sized publishers and letter shops, industrial corporations or major mail order groups from Germany and all over Europe.

Now we are looking forward to *your* inquiry.

Your Pohl-Scandia Team

## THE PRODUCT

Perfect packaging design

Packing efficiently and safely

Saving time, material and postage

Avoiding packaging frustration

Ecologically responsible shipping

## ► Feels Good Right from the First Packaging.

### **Each of our products offers an important benefit**

Our experience! From the smallest to the largest, from the first to the last packaging, there is one thing you can be sure of: You have placed your trust in the best. Piece by piece our products have stood the test in practical application.

### **Easy handling and efficient packaging**

Let our time-tested and continuously enhanced packaging solutions help you to reduce your work and material expenditure, for instance with additional flexibility or efficient self-adhesive closures.

Even if the purchase price of a packaging seems ever so low, increased time and material expended on the packaging process can quickly negate this advantage.

### **Best possible protection for your goods during the entire shipping route**

Top quality material, secure packaging design with bend and edge protection and variable sizes offer maximum protection for your goods.

From the time of packaging up to the time of delivery to the recipient. Take no risk and trust in our time-tested packaging solutions.

### **Optimised packaging design saves costs and resources**

Flat packaging shapes that take up little space and variable sizes go easy on your precious storage resources, allowing you to save as much as possible on postage and unnecessary filling material.

### **Convenient packaging: Frustration-free opening and disposal**

The recipient and his expectations - all too often disregarded.

Not by us. Offer your end customer a maximum of convenience with packaging that won't leave him frustrated, for instance solutions with integrated easy-open tear strip. Customised packaging sizes eliminate the use of unnecessary fillers while ensuring the recipient is left with only little waste to dispose of. And with a good feeling.

### **Professional impression: With print**

Good packaging solutions carry weight. Use this opportunity and increase your brand recognition level - with a customised print or logo. Benefit from a wide range of finishing options:

Plain and catchy or extravagant with special effect varnishes and strong haptic effects. From small batch series to series with millions. Produced in highest quality and compliant with latest process standards. Almost all our products are available as customised production. We will be happy to advise you.

### **Ideal protection for returns**

More than 90% of all returns are shipped in the same packaging in which the goods were received. So by selecting the correct packaging already for your shipping you can guard against possible transport damage on the way back and thus prevent losses caused by damage or even total loss.

### **Sustainability as basic principle**

Our products are predominantly made from 100% recycling fibres and are of course 100% recyclable. And what's more: packaging designs requiring a remarkably low use of materials, the greatest possible share of recycling raw materials, a conscientious procurement policy, systematic waste management and production and administration 100% supplied with green electricity complement this principle. Each of these components greatly contributes to the protection of the environment with every packaging we produce.

Shipping goods in an ecologically responsible manner. With Pohl-Scandia.

## THE DETAILS

Powerful peel and seal

Integrated easy-open tear strip

Flexible applications

Bending and edge protection

Fast, safe handling

## Good Packaging Can Do More Than Just Protect.

### **Secure peel and seal closure due to strong hotmelt adhesive**

Not just "closed", but safely and permanently sealed.

This you can rely on with our laboratory-tested powersealing. A projecting cover strip is easy to grab and peel off. Try it by yourself.

### **The red thread**

Fast and convenient opening of our packages thanks to the integrated red easy-open tear strip. Pull tabs on both sides allow a quick opening of the package. No tearing off halfway through - the crucial advantage over tear-open aids with perforations only. No ifs and buts, no frustration.

### **Functional creasing lines for flexible applications**

Most of our packagings are equipped with additional creasing lines for different contents. A rectangular, circumferential creasing line in the cardboard mailing bags permits the sides to be easily erected and readily adapted to thicker contents. At the same time, an additional buffer zone is formed at the edges. Our variable corrugated board mailing packaging can also be quickly and easily adapted to different contents and sizes - by their clever design and auxiliary creasing lines.

### **Additional bending and edge protection**

Two side flaps glued outside on our mailing bags and envelopes offer even higher bending and edge protection due to the additional material along those edges of the packaging that are under particular stress. A significant advantage over simply bonding the material along the middle. On our variable corrugated board packaging Varia T-Pack and Varia X-Pack, a double-layered protective edge provides maximum safety all around. Extremely strong and tough.

### **Fast and injury-free handling**

Easily and quickly folded due to crash lock bottom, integrated CD retention for media dispatch, accurately fitting closure flaps and many other features: This is what our selection of different packaging solutions has to offer.

Suitable either for general or for specific purposes, they add particularly cost-saving and efficient handling to your packaging processes.

Safe and thick cardboard instead of sharp paper edges or soft edge cutting lines on corrugated board products provide for the necessary protection against cut injuries.

### **Selecting the right material**

Each mailing packaging offers special features, functions and applications. Selecting the right material considerably contributes to creating a perfect whole.

Materials range from light chromo duplex board for catalogue mailings to extra-solid cardboard or corrugated board that offers maximum protection for a book. Available in elegant white or ecological brown. Our products are predominantly made from 100% recycling fibres and are of course 100% recyclable. We offer the alternatives. The choice is yours.

### **Resealable packaging**

In case goods have to be returned, many of our products offer additional means of reclosing, e.g. punched holes for clamps or clips. Ultimately, all packaging can be re-used for returns, e.g. by resealing with packing tape.

# CREATIVE INNOVATIVE

## Customised Production and Finishing Options

Creative packaging solutions

Premium offset print

Attractive embossing

Paint & varnish put to great effect

Sensory experiences

### Application examples

- ▶ Innovative product and sample mailings
- ▶ Impressive promotional or gift mailing packaging
- ▶ Premium-quality VIP mailing packaging
- ▶ Promotionally effective mailing packaging in your corporate design

### Options

- ▶ Customised product design according to your preferences and needs
- ▶ Customised sizes and design versions
- ▶ Added value such as individual coding, window or integrated foil pouches
- ▶ Premium sheet-fed offset print using up to 6 colours (hexachromatic)
- ▶ Dispersion varnish, matte or glossy
- ▶ Special effect varnishes, e.g. UV spot, matte, relief, SoftTouch, DripOff, Iriodin® etc.
- ▶ Extraordinary sensory message conveyed by scents or haptic perception
- ▶ Blind, relief or hot foil embossing, contour and shape punching
- ▶ Braille elements for blind and severely visually impaired persons
- ▶ Use of special materials, e.g. with textile lamination, mirror cardboard and others
- ▶ Numerous combinations of these different finishing options
- ▶ Making of hand-made prototypes

### CREATIVE MAILING PACKAGING<sup>PRO</sup>

We take great pleasure in developing attractive and extraordinary packaging solutions together with you.  
Please send us your enquiry.

## FAST AND FAVOURABLE

Short delivery times

Budget-friendly alternative

Ideal for small-scale series

Wide range of goods

Numerous options

## Subsequent Printing and Embossing of Finished Products

### Application examples

- ▶ Business stationery, for instance for mail order companies

# What is a... ? Technical Terms Concisely Explained

**Automatic bottom:** Pre-folded, glued bottom structure facilitating a fast erection of the box/carton. Also: Rapid folding bottom, crash-lock bottom.

**B flute:** Single wall corrugated board type with a thickness of approx. 2,2 - 3,1 mm. For instance used for smaller mailing boxes for lighter goods.

**BC flute:** Double wall corrugated board type with an overall thickness of approx. 5 - 7 mm. For instance used for shipping cartons for heavy goods.

**Bleed:** Area of the printed motif that goes beyond the edge of the material or product. Also: Bled-off.

**C flute:** Single wall corrugated board type with a thickness of approx. 3,1 - 4,0 mm. For instance used for standard mailing boxes for light to moderately heavy goods.

**Circumferential creasing lines:** Additional creasing lines for cardboard or corrugated board mailing bags and envelopes, which allow the packaging to be erected to adapt to thicker contents, at the same time forming an additional edge protecting.

**Cover strip:** Coated, peel-back paper strip to cover the adhesive strip on the closure flap. Also: Abhesive strip, silicone paper strip.

**Crease-to-crease dimension:** Dimensions of the packaging describing the distance from the centre of the creasing/scoring lines to the centre of the opposite lines along which the packaging will be folded later on. The crease-to-crease dimension is thus larger than the usable/inside dimension.

**Dispersion varnish:** Water-based varnish frequently used for offset printing. For glossy or matte finishing and to protect the coloured motif.

**Double edge protection:** Double-layer glued, lateral edge protection on mailing packaging, which compared to the single-layer edge protection is considerably more solid and secure.

**Easy-open tear strip:** Recyclable plastic tear-open aid that is already integrated during production. More tear-resistant than perforations.

**E flute:** Single wall corrugated board type with a thickness of approx. 1,0 - 1,9 mm. For instance used for mailing bags and mailing packages for lighter goods.

**Envelope shape:** Design of a paper or cardboard sleeve with opening and closure flap on the wide side.

**Euroscale:** Print colour system consisting of 4 basic colours, so-called process colours: Cyan, magenta, yellow, black ("key colour"). Also: CMYK.

**Fill height:** Maximum usable inner height of the packaging.

**Flexographic printing:** Direct relief printing method with predominantly plain print quality. Most commonly used for corrugated board packaging.

**Full-tone colours:** Print colours with own colour definition, which cannot be generated with the CMYK colour printing process. During the printing process, these are printed together with other colours, but by means of a separate inking unit. Also: Spot colours, special colours.

**G - Folding Box Board (FBB) - Chromo Board:** Higher cardboard quality with white, mostly multiple-coated, wood-free top layer. Light/white middle and back layer. Mostly made completely from virgin fibre.

**GD - White Lined Chipboard (WLC) - Chromo Duplex Board:** Good cardboard quality with white, coated, wood-free top layer. Grey middle and back layer. Very high recycled fibre share.

**GT - White Lined Chipboard (WLC) - Chromo Triplex Board:** Good cardboard quality with white, coated, wood-free outer liner. Grey middle and light back layer. Very high recycled fibre share.

**GZ - Solid Bleached Sulphate Board (SBS) - Chromo Sulphate / Cellulose Board:** Premium cardboard quality with bright white, very well coated, smooth top layer. Optionally coated on one or two sides. Completely made from virgin fibre.

**Grammage in g/m<sup>2</sup>:**

Specification of mass as a function of area. An example: 250 g/m<sup>2</sup> means the weight of 1 m<sup>2</sup> of this carton is 250 g.

**HKS colour system:** The HKS colour system comprises basic colours and full-tone colours (spot colours) and is used for the reproducibility, communication and independent assessability and comparability of certain colour shades in the graphics

industry. A distinction is made between N colours for uncoated printing substrates and K colours for coated printing substrates (art printing, illustration printing).

**Inside dimension:** Internal dimensions of the packaging that can be utilised for the goods to be packaged. Also: Usable dimension.

**Mailing bag shape:** Design of a paper or cardboard envelope with opening and closure flap on the small side.

**Offset printing, subsequent:** Customised printing of small series is done by means of subsequent offset printing (overprinting), an indirect planographic printing method where each individual product (finished product / stock item) is printed. Up to 2 colours (cardboard products) or 4 colours (paper products) can be used for printing. There will be no varnishing. Motif restrictions must be allowed for.

**Outside dimension (ready for posting):** Outside dimensions of packaging in sealed state, ready for dispatch.

**Outside glued side seams/flaps:** Production method for mailing bags and envelopes with 2 side flaps that are glued on the exterior. More reliable than inside glued flaps.

**Over-/underdelivery:** Customary quantity tolerance due to technical reasons in the case of customised productions. The smaller the production quantity, the larger the final quantity delivered can deviate from the quantity ordered (see Terms and Conditions, item VI, clause 4).

**Pantone colour system:** The Pantone colour system (Pantone Matching System / PMS) comprises basic colours and full-tone colours (spot colours) and is used for the reproducibility, communication and independent assessability and comparability of certain colour shades in the graphics industry. A distinction is among others made between C-colours for coated and U-colours for uncoated printing substrates.

**Peel and seal closure:** Self-adhesive closure with strong hot-melt adhesive strip, protected by a peel-back cover strip.

**Printing area:** Portion of the print motif area on the material area (100%) to be printed. Specified in %.

**Set-off of the printing ink:** Transfer of fresh printing ink (set-off) to a product stacked above or below.

**Sheet-fed offset print:** Individual custom-made products are produced by means of sheet-fed offset print, an indirect planographic printing method, where the whole cardboard sheet is printed and not the individual finished product. Up to 6 colours and 2 standard or special effect varnishes can be used for printing. Sheet-fed offset printing is followed by punching, folding and glueing of the packaging.

**Special colours / spot colours:**  
see: Full-tone colours.

**Tuck-in flap closure:** Solid tuck-in closure for packages that must be left open for inspection by postal services, such as book and goods shipments. Clearly sturdier than a plain tuck-in closure.

**Twist-n-wrap/cross-shaped flat pack carton:** Type of mailing packaging that can be stored as space-saving flat-lying carton blank. The outer layer and the inner section that is erected and then turned inwards by 90° together form the cross shape.

**UD - Uncoated white lined chipboard - Duplex (WLC):** Standard cardboard quality with white, uncoated top layer. Grey middle and back layer. Very high recycled fibre share. More absorbent surface than coated cardboard types, e.g. for inkjet franking.

**Usable dimension:**  
see: Inside dimension

**Wrap around packaging:** Type of mailing packaging that can be stored as space-saving flat-lying carton blank. For packing, 2 side flaps are erected, the goods to be shipped are inserted, the side flaps are folded down again and then the outer layer is wrapped around and sealed.

## MEDIENBOX 3-in-1

## Corrugated Board Mailer for CD/DVD/BDs

Suitable for: CD, DVD or BD

Adaptable  
fill height

Postage-optimised: Large/Maxi Letter

Break-out address window

**SPEEDMAN®  
BOX****Filling Material in Dispenser Box  
100% Recycling Paper**

Dispenser box: Ready to hand

Endlessly flexible

Space-saving and very high yield

Ideal for online retail

100% eco-friendly

**Application examples**

- For padding toys, decorative items, collector's items and much more

**Product benefits**

- Ready to hand: Immediately available from the convenient dispenser box
- Endlessly flexible: Suitable amounts of filling as required
- Requires only a fraction of the storage volume of filling chips or bubble wrap
- Very economical: 1 box for up to 1.000 parcels
- Ecological: Made from 100% recycled material, 100% recyclable
- Ideal: Prevents damage and claims
- Frustration-free: Avoids dealing with annoying filling chips and bubble wrap
- If 3 or more boxes are required per month: Optionally available as manual or electrical dispenser solution, offering time and price advantage

## First-rate packaging

Karl Knauer KG with their **exceptionally wide service and production range** when it comes to **folding boxes** count among the leading suppliers in Europe in the field of packaging.

For eight fields of expertise in this line of business, Karl Knauer offer specialised product ranges comprising **state-of-the-art packaging technologies**:  
Cosmetics/personal care, blister cards, pharmaceuticals/health, environment/nature, agriculture/food, beverages, home/industry and mechanical engineering. Beyond that, we are working intensely on developing innovations for the packaging requirements of the future. Our research covers the fields of convenience, product safety, forgery protection, finishing technologies or efficiency and sustainability.

We have already been active for quite some time as far as **sustainability** issues are concerned: Whether by means of a responsible procurement policy, FSC® and PEFC™ certificates or by means of product design and implementation with as little material usage as possible.

## Unique advertising

Make a note immediately. **Memo advertising media** from the heart of Europe from Karl Knauer. As one of leading manufacturers of cardboard and paper memo advertising media in Europe, our name is synonymous with **quality and innovative products**. Increasing the customer benefit and thereby offering added value is paramount to us.

Whether adhesive notes, writing pads, note boxes or blotting pads, we offer inspirational solutions creating high and long-lasting advertising effects. Strong standard range, innovative and open to new ideas.

**Sustainability** has a long tradition with us. For many of our products, we are today able to offer both the use of FSC® and PEFC™ certified materials as well as FSC® certified production.

## Give away the perfect gift

Karl Knauer is Germany's market leader in **gift packaging**. Making use of a wide array of technologies, we design, print, refine and produce a unique selection of premium-quality gift packaging for retail, the corporate sector or the ultimate consumer. We are considered the trendsetters when it comes to implementing designs: Whether classic or modern, with or without finishing, for Christmas or anniversary - we offer a wide variety of packaging **for any taste** and occasion.

Karl Knauer offers a particularly large selection of attractive motifs as well as a wide, **innovative range of refinements**. Varnishing, blind, relief or foil embossing, elaborate punching, lamination and appliqués produce brilliant finishing results over and over again.

# LAYOUT

## Guidelines On Motif Design and Print Data Compilation

### Please keep in mind the following important points when compiling the data:

- For the layout design, we will be happy to provide you with the required outline data as a PDF template. Please let us know in case you prefer a different data format.
- Please provide us with complete and binding data in 1:1 original size for position, text and colour.
- Pay attention to an accurate definition of the colours and halftone values (e.g. Pantone 248 C or 50% Pantone 248 C).
- Ideally, your data will be supplemented by a preview PDF file for verification and/or a binding proof. Ordinary hard copies printed on a conventional office-printer cannot be used.
- If HKS or Pantone colour numbers are specified, printing will take place with the currently valid colour values. Customised special colours are printed on request.
- To protect them from changes, all fonts should basically be converted to paths/vectors.
- If a function is not available, it is compulsory to completely make available all elements used (pictures, fonts, etc.) (for instance Adobe InDesign: Package, Preflight+Package)
- Selected font sizes may not be smaller than 6pt and line width not less than 0,2 mm.
- Bled-off motifs only after prior agreement; please create 3 mm trim allowance.
- Keep min. distance of 5 mm from motif to material edges, trimmed edges and creasing lines (except for sheet-fed offset printing).
- To ensure a perfect printing quality, use images with min. 300 dpi, ideally 600 dpi.
- Line art with min. 600 dpi, ideally 1,200 dpi or vector data.
- Picture and graphical elements used must be embedded, where necessary enclose an additional separate copy
- Parts of motifs that are not required must generally be completely removed, not just covered for example
- Do not use highly compressed or low resolution image data (e.g. GIF, PNG, small JPG, pictures from web pages).
- Create print data in CMYK colour mode; do not use RGB mode.
- Always create spot colours (HKS, Pantone, etc.) separately as solid/full-tone colours.
- MS Office files or similar will not be accepted or will possibly be reworked to ensure printability at cost.
- Associated files must be created in a directory.
- Always prepare e-mail attachments by means of a compression programme (e.g. ZIP) to avoid possible coding/decoding errors of single files caused by e-mail programmes.
- Submit all data in copy only. All provided data without repeat order will be irrevocably deleted after a period of 12 months. Long-time archiving on request.
- The customer has to check himself sender's instructions and postage-paid impression with regard to up-to-dateness and specifications of the respective service providers. These will not be checked by us.
- Restrictions of the motif design with regard to area coverage and motif bleed at the edges apply in particular for subsequent printing on finished goods: Large-scale motifs must be avoided to minimise a possible build-up and transfer of printing ink or a set-off of the printing ink. Please feel free to contact us to discuss your design requirements.
- The data provided we use to compile a PDF file for verification and approval with regard to design, size, position, text and colour spectrum. This approved master copy will then be binding for production.
- In case of transmission of data which deviate from the above guidelines and lead to additional work, any costs arising for post-processing ordered will be separately calculated at cost. The costs for data setup and changes will be invoiced separately.
- By request, we also compile available individual data into an overall layout. Calculation at cost.
- We will be happy to offer further layout work on request.

### Our shared aim

Please compile your data with due care and clarity. Only printing files that have been thoroughly prepared guarantee a maximum in process reliability when preparing for printing and maximum quality for the print result - our shared aim.

Thank you very much for your support.

## General Terms and Conditions of Pohl-Scandia GmbH

All offers, orders and agreements shall be based on the supplier's terms and conditions. They shall be considered accepted by order placement and/or acceptance of the delivery if the customer has been provided the opportunity to take note of their contents in a reasonable manner within the scope of the business relationship. Different conditions shall only become binding if they have been expressly accepted in writing.

### I. Offers and prices

- Offers are only binding in writing; otherwise they are non-binding. Prices mentioned in an offer are net in Euro (excluding value added tax); they apply under the proviso that the order data on which the offers are based remain unchanged; otherwise the further procedure shall follow paragraph 2 of this section. Prices are calculated for orders that are executed without any interruptions for which the customer is responsible. If the customer requests partial deliveries, any resulting extra costs shall be invoiced additionally.
- If essential changes to the daily prices occur between order confirmation and delivery, the contracting parties agree to negotiate a price adjustment.

### II. Order placement and acceptance

The order shall be considered accepted if the purchase order is confirmed in writing by the supplier. Changes shall require written confirmation.

### III. Delivery and packaging

- For orders with a net merchandise value (without value added tax) of at least EUR 250, dispatch shall be effected free of freight and packaging charges to the nearest general cargo receiving station within the Federal Republic of Germany, except for surface freight and deliveries by own company trucks for own account, irrespective of the invoice amount. The customer shall bear the freight costs incurred for mail items, express or fast freight items that exceed the general cargo rate. The customer shall bear the postage, freight and packaging costs for order values under EUR 250 (without value added tax). Goods are dispatched at the recipient's risk. Damaged goods may only be accepted once the deliverer has expressly accepted the damage in writing. The risk shall also be transferred if the supplier has to place the goods into stock due to a delay in dispatch caused by the customer. Unless otherwise agreed upon, the supplier shall select packaging, dispatch route and mode of dispatch at his best discretion.
- The supplier shall accept return deliveries of packaging within the scope of the duties imposed on him by the Packaging Ordinance. Pallets, cover boards, wooden crates or other returnable packaging shall remain the supplier's property. The customer can return packaging at the supplier's premises during customer business hours after prior timely notification, unless another point of acceptance/point of collection has been specified to him. Packaging can also be returned to the supplier on delivery, unless another point of acceptance/point of collection has been specified to the customer. Returned packaging shall only be accepted immediately after delivery of the goods; in case of subsequent deliveries only after prior timely notification and provision. The customer shall bear the cost of transport for the used packaging. If a specified point of acceptance/point of collection is further away than the supplier's business, the customer shall only bear the cost of transport that would arise for the distance to the supplier's business. Returned packaging must be clean, free of foreign matter and correctly sorted according to the type of packaging. Otherwise the supplier shall be entitled to charge the customer with the additional costs arising for the disposal.

### IV. Delivery time and delay in delivery

- Delivery dates confirmed by the supplier are based on a continuous production of the respective order and shall be valid from the date of order confirmation. For printed goods, the delivery time shall only commence from receipt of the approved press proof. Any interruptions induced by the customer during the term of the order shall extend the delivery dates accordingly.
- In case of a delay in delivery, the customer shall have to set a reasonable grace period in accordance with §326, clause 1, German Civil Code (BGB). If this grace period is exceeded, it shall only be possible to claim compensation in case of wilful intent or coarse negligence. Any compensation shall be restricted to the damage that was foreseeable at the time of contract conclusion. Covering purchase shall be excluded.
- Disruption of operations both of his own operations and of third party operations from which production and transport critically depend shall discharge the supplier from having to adhere to the delivery time without compensation, shall entitle the supplier to make partial deliveries or to withdraw from the contract, if no remedy can be found in good time or only at unreasonably high expenditure. As disruptions of operation within this meaning shall be considered any serious obstacles, which, when viewed objectively, the supplier cannot be held responsible for (force majeure), in particular resource and energy scarcity, traffic bottlenecks, intervention by the authorities, industrial dispute, war and riots, as well as fires and machine damage.

### V. Call-offs and default of acceptance

- Unless other deadlines have been expressly agreed upon, call-off orders shall be subject to a term of acceptance of maximum six months. If this deadline is exceeded, the supplier shall from this point in time be entitled at his discretion to either increase the price per 1000 pieces for every further month by 1% to cover storage costs, interest payments and similar, or to invoice the total quantity, deliver it to the customer or store it at the latter's expense.
- This shall also apply if the acceptance of ordered quantities does not take place at the agreed point in time. In both cases, the quality and hazard risk shall pass to the customer at the point in time of default of acceptance.

### VI. Execution and complaints

- If goods are sold according to samples, these shall be considered non-binding insofar as deliveries are machine-produced, with the total delivery being decisive for the evaluation and not the quality of individual pieces.
- Orders shall be executed in accordance with the state of the art within the scope of technically necessary material- and process-related tolerances in customary quality. Customary deviations with regard to colour, weight and stock composition shall be reserved and shall not entitle the customer to complaints.
- The customer shall be obligated to check the printing and/or production specifications, to sign them and return them to us and to make any corrections in a clear and unambiguous manner.

The supplier shall not be liable for any faults that were overlooked and not objected to. If no proof is required, the printing template shall be decisive.

- For custom-made products, an excess or short delivery of up to 10% of the order quantity shall be permitted. For delivery quantities below 25,000 pieces, this percentage shall increase to 20%. When processing specially made special papers, the supplier reserves the right to process the entire quantity delivered by the paper manufacturer. This shall also apply to special formats. When partial quantities are delivered, the smallest original packaging unit shall in general be delivered.
- Notifications of defects for obvious defects can only be considered in writing within 8 days after arrival of the goods. Concealed defects, which cannot be detected on immediate examination, can only be asserted vis-à-vis the supplier if the notification of defects is received by the supplier promptly upon its discovery within 3 months after the goods have left the supplier. Accepted notifications of defects shall entitle the supplier at his discretion to price reduction, substitute delivery after a reasonable period of time or to withdrawal from the contract. Any further claims for damages shall be ruled out, unless they are regulated in the German Civil Code (BGB).
- Processed and printed goods cannot be taken back.
- Printing documents, punching equipment, tools, printing plates, lithos etc. shall remain the supplier's property unless these have been provided by the customer. The customer is able to purchase these by means of a separate purchasing agreement.

### VII. Payment

- Payment shall have to be effected within 30 days after invoice date net and without deductions. If the due date is exceeded, default interest in the amount of the bank credit interest shall be charged.
- Deviating agreements with regard to the due date for payment and any cash discount granted are possible and require the written confirmation of the supplier.
- In the case of custom-made products, extraordinary preparatory effort or initial deals, an adequate advance payment can be requested.
- Bills of exchange shall only be accepted following prior special agreement and on account of performance; discount charges and stamp duties shall be borne by the customer. No cash discount can be granted in the case of promissory notes or customer bills of exchange.
- If a considerable worsening of the customer's financial circumstances becomes known or if he gets into default of payment or acceptance for these reasons, the supplier shall be entitled to refuse further deliveries or to demand immediate payment also of goods not yet delivered, invoices not yet due and bills of exchange and cheques not yet due, insofar as the amounts are covered by expenses already incurred by the supplier in performing the order.

### VIII. Reservation of title

- The goods shall remain the supplier's property until the customer has completely paid all receivables due by him vis-à-vis the supplier. The customer shall only be entitled to resell in the ordinary course of business. The customer herewith assigns his receivables from the resale to the supplier. The supplier herewith accepts the assignment. At the latest in the case of default, the customer shall be obligated to provide the name of the debtor of the assignment receivables. If the total value of collateral security for the supplier exceeds his receivables by more than 20%, the supplier shall at the customer's request or at the request of a third party affected by the supplier's over-collateralisation be obliged to release securities at the supplier's discretion.
- In case of treatment or processing of goods delivered by the supplier that are his property, the suppliers shall be regarded a manufacturer in accordance with § 950 German Civil Code (BGB) and shall at any time of processing retain ownership in the products. If third parties are involved with the treatment or processing, the supplier shall be restricted to a share of co-ownership in the amount of the invoice amount for the goods that are subject to retention of title. The property thus acquired shall be considered property to which the title has been retained.

### IX. Data storage

The customer agrees that the supplier stores data of the customer as defined by the Federal Data Protection Act.

### X. Archiving

Any products belonging to the customer, in particular data and data carriers, shall only be archived by the supplier after express agreement and against special remuneration beyond the time of handover of the final product to the customer or his vicarious agents. If the above-mentioned items are to be insured and nothing has been agreed to this effect, the customer shall have to attend to this himself.

### XI. Industrial property rights/copyright

The customer shall assume sole liability if the execution of his order violates the rights of third parties, in particular copyrights. The customer shall indemnify the supplier from all claims of third parties attributable to such an infringement.

### XII. Place of performance, choice of law and jurisdictional venue

The place of performance for delivery and payment for both parties shall be the domicile of the supplier regardless of the value of the claim. German law with the exclusion of the United Nations Convention on Contracts for the International Sale of Goods shall apply to the entire contractual relationship between the supplier and his commercial contractual partner. Jurisdictional venue shall be the supplier's domicile.

Version: April 2016

**PHONE:** +49 (0)7835 / 540 94 0  
**E-MAIL:** verkauf@pohlscandia.com

Item No.	Description	Quantity samples	Quantity to quote

We herewith kindly ask you to send us the mentioned free product samples and a non-binding offer.

## Notes on requesting your samples

Pohl-Scandia GmbH will be happy to send you the requested free items in the customary sampling quantities. Within Germany, the items are delivered free domicile.

Thank you for your understanding that larger quantities, consignments to German islands, abroad or via express can only be sent after prior consultation and possibly not completely free of charge. Please contact us beforehand in this connection. Thank you very much.

Design and quality of our samples are non-binding. Deliveries can therefore differ in this regard. Possible deviations shall therefore not entitle you to raise any claims.  
 If you would like to receive binding samples, please bring this up directly with us.

**Terms and conditions of payment**

Please keep in mind the minimum order value of EUR 250 plus value added tax. Below that we will charge an order lump sum of EUR 50.

Within Germany, the items are delivered free domicile. Additional freight charges will be invoiced for consignments to German islands and abroad. Please enquire these from us when needed.

The delivered goods will remain our property up until complete payment of all former and future invoices. Our invoices have to be settled in accordance with our terms of payment. When placing your first order as new customer, we kindly request advance payment.

When placing your order, please bear in mind that due to different catalogue printing methods and material property tolerances, the products' colours can always deviate.

Our catalogues and price lists are exclusively intended for industry, retail and commerce.  
 All prices are exclusive of the statutory value added tax. Typographical errors, mistakes, price changes, technical modifications and prior sale reserved.
